

Smart Elevator Controls

The simple and secure way to control key-fobbed elevators from a smartphone.

Streamline access throughout your building from the front door to the right floor.

EASY AS 1-2-3

1. A guest or delivery person calls a tenant through the smart intercom.

2. The tenant grants them property access, which temporarily unlocks the key-fobbed elevator.

3. The guest enters the elevator and can only access the floor of the tenant they're visiting.

WORKS WITH VIRTUAL KEYS

When a guest uses a virtual key, key-fobbed elevators are automatically unlocked for a set period of time, allowing access to the tenant's floor.

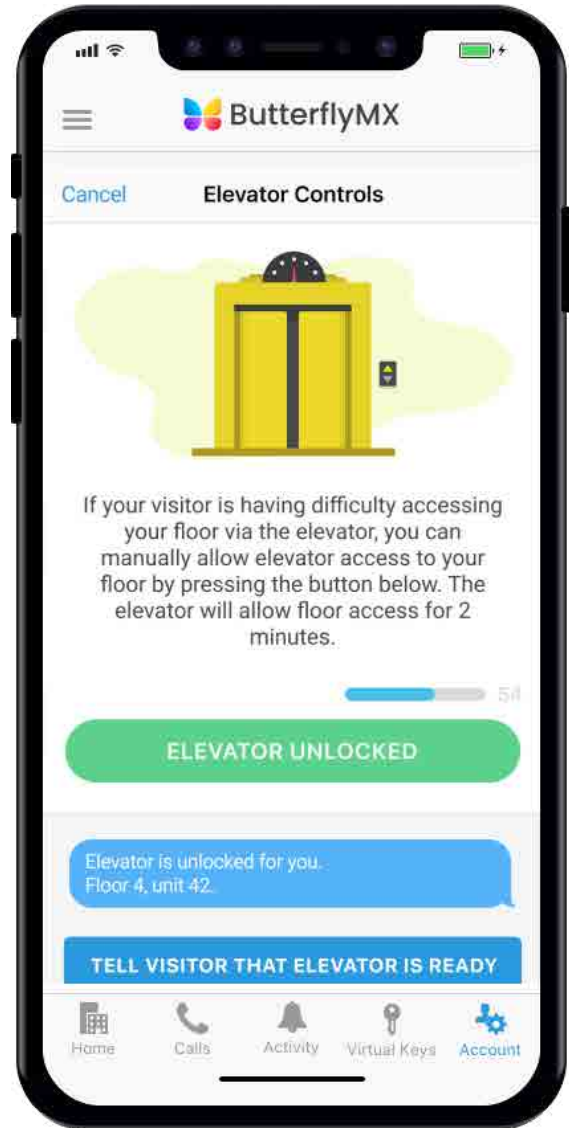

EASILY NOTIFY GUESTS OF ELEVATOR ACCESS

Tenants can send guests a text message notifying them that the elevator has been unlocked and they can access it to get upstairs.
