

Property Management System Integrations

Spend less time on manual data entry and managing access credentials and more time delighting your residents.

BUTTERFLYMX CAN SYNC WITH ANY PMS, BUT WE HAVE INTEGRATIONS

WITH:

- Entrata
- MRI Software
- Condo Control
- RentManager
- FirstService Residential
- Greystar
- Yardi
- AppFolio
- RealPage
- Buildium

To set up your PMS integration, contact our support team at (800) 398-4416 ext. 2

By integrating ButterflyMX with your property management system through a process called Sync, changes made to your resident directory are automatically reflected in the ButterflyMX system. So, new residents are granted property access permission on their move-in date, and former residents' permissions are revoked upon move-out.

BENEFITS OF SYNC:

- Saves time.
- Reduces user error.
- Seamlessly onboard residents by granting property access permission when their lease begins.
- Automatically revoke former residents' access permissions upon move out.

HOW SYNC WORKS:

1. Retrieves the resident list from your property management system.
2. Compares your property management resident list with the list in the ButterflyMX database.
3. Updates the resident list in the ButterflyMX database based on any access changes in your PMS
