

# Package Room

The best way to manage package deliveries at your property.

Property managers should be focused on resident security and convenience, not managing deliveries.

## HOW THE PACKAGE ROOM WORKS:

Couriers deliver to your package room by entering their designated delivery PIN in the intercom mounted at the door.

Your residents receive an email, text, or in-app notification alerting them of their delivery.

Residents enter their PIN code at the package room intercom to pick up their items.

## SECURE

The intercom takes a time- and date-stamped photo of everyone who enters the package room. An optional camera tracks activity in the room to prevent package theft.

## EASY PACKAGE RETRIEVAL

Residents retrieve their packages using a four-digit PIN — no need to request access from property staff.

## SEAMLESS PMS INTEGRATION

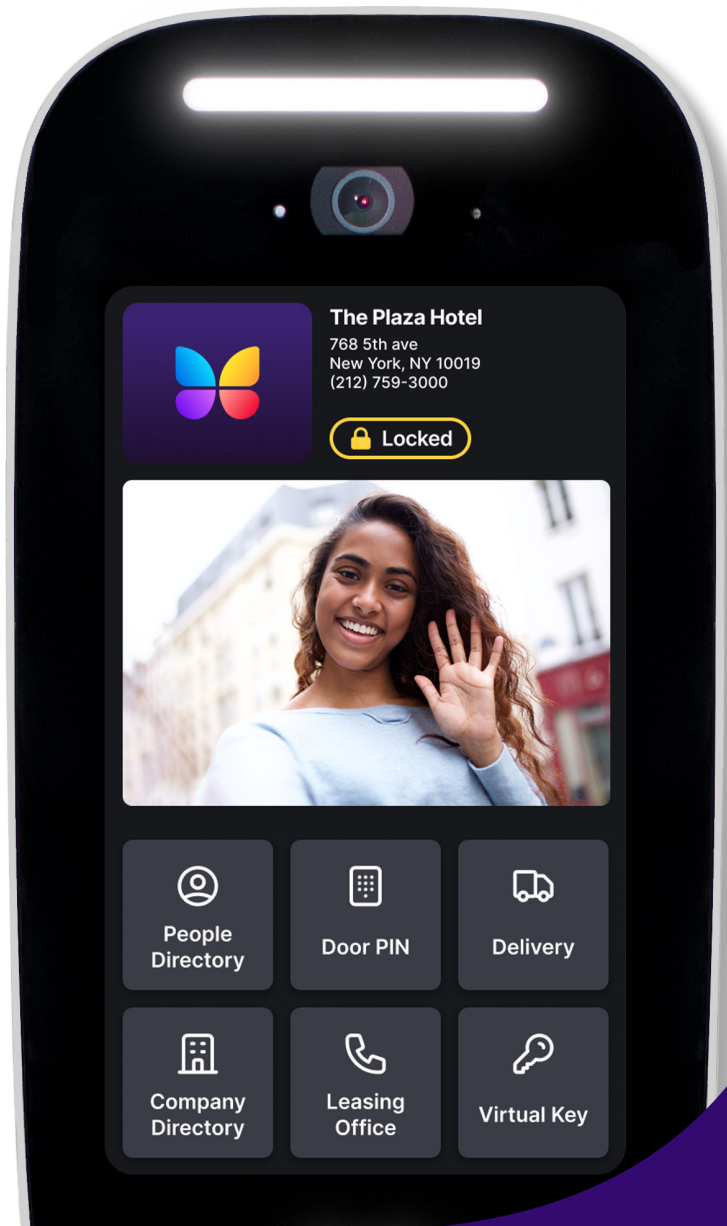

Connect with your property management software to keep your resident directory updated in real-time.

## INCREASED NOI

Streamline your property management team by using a package room instead of hiring additional staff to manage deliveries.

## MORE ABOUT BUTTERFLYMX

ButterflyMX is your complete property access solution, providing a secure, convenient, and affordable way to manage and grant access on the go. Empower your tenants and building staff to open doors, gates, and elevators with a smartphone and ensure they never miss a visitor or delivery. Enjoy easy installation and cut costs by eliminating building wiring and in-unit hardware, and save time by integrating with popular access control and property management systems. Join the 10,000+ multifamily, commercial, gated community, and student housing properties that have made access simple with ButterflyMX.
