

Kwikset UNITE™ BLE and RFID Smart Locks

Seamless property-wide access.
No WiFi required.

With the Kwikset UNITE™ integration, residents can use the ButterflyMX mobile app to access every door and gate at their property, including their unit door. With BLE and RFID options offered, properties can now offer a modern access experience without the need for building-wide or managed WiFi.

One app for every door

Deliver a fully keyless experience across your property. Residents can access both the building and their unit directly from the home screen of the ButterflyMX mobile app.

Managed in the ButterflyMX OS

Property managers can manage Kwikset smart locks directly through the ButterflyMX OS. No additional platforms or hubs required.

Access made simple

Unlock available via Bluetooth or with RFID fobs or keycards.

Boost resident & tenant satisfaction

Offer your residents and tenants a modern, convenient way to unlock doors without extra apps or mechanical keys.

Simplify operations & reduce costs

Lower installation and maintenance costs by eliminating WiFi or alternate connectivity hubs - all while maintaining reliable property-wide access control.

Enhance security & convenience

Kwikset UNITE™ locks use Bluetooth and Smart Fob/Card credentials for offline access, backed by the trusted reliability of ButterflyMX.
