# ButterflyMX

Amenity reservations

Effortless amenity reservations management

Simplify the amenity booking process by allowing residents to view, book, and access amenities directly from the ButterflyMX mobile app while also enabling property staff to manage and collect payment for their amenity spaces.

HOW IT WORKS:

1. Set up the building's amenity areas using the ButterflyMX OS

2. Residents explore and reserve amenities, add guests to their booking, and manage key preferences through the ButterflyMX mobile app

3. Reservations requests are added to the building admin portal in the ButterflyMX OS for review and approval

4. Once approved, residents can effortlessly unlock amenity doors from the home screen of the mobile app

Effortless management:
Property staff can configure their amenity spaces in our cloud-based dashboard in just a few clicks. Quickly approve and manage reservation requests at any time or configure the system for auto-approval.

Reserved access:
Exclusive and time-restricted access is granted to residents and their invited guests only, ensuring a private experience within amenity spaces.

Payment transparency:
Hide or display payment information, track payments made, and quickly identify reservations with outstanding balances.
