Access Feature

Visitor Pass Sharing: Unit Address

The ButterflyMX Visitor Pass provides all essential details for a guest's visit. Property managers have the option to display either the building address or the unit issuer's address.

To display the unit issuer's address

01. Contact your ButterflyMX Client Success Manager to enable this feature for your building.

02. Update unit labels to show the address or any information the tenant would like displayed in the address of their Visitor Pass.

03. Visitor Pass addresses in text, email, and Apple Wallet will show the unit label instead of the building address - but will keep the building's city, state, and zip code

Example

Building Address

25 Second Street
New York, NY
10001

Visitor Pass: Building Address

Sally Daniels has invited you to 25 Second Street, New York, NY 10001. When you arrive, select "Visitor Pass" and enter this PIN: "529847". You can also use the intercom to call your contact.
